## EDUCATION

- Master of Computer Application | Techno College Hooghly | Hooghly, WB (2025–2027)
- Bachelor of Computer Application | Techno India (Hooghly Campus) | Hooghly, WB | CGPA: 8.09 (2022–2025)
- ISC (Higher Secondary) | Meghmala Roy Education Centre | Kolkata, WB | 72.4% (2020–2022)
- ICSE (Secondary) | National Gems Higher Secondary School | Kolkata, WB | 75.57% (2010–2020)

## PROJECTS

### (I) Personal Portfolio Website | July 2024

- Developed a responsive personal portfolio website to showcase technical skills, projects, and professional profile in a digital format.
- Designed user interface and layouts using Figma, ensuring clean and modern UI/UX principles.
- Converted designs into functional web pages using HTML5 and CSS3.
- Implemented basic interactivity and form validation using JavaScript.
- Created a Contact Us module enabling users to send queries via email.

Technologies: HTML, CSS, JavaScript

Tools: VS Code, GitHub, Figma

### (II) Online Quiz Website – QuizSphere | June 2024

- Built an online quiz management system allowing students to attempt quizzes based on their UG courses.
- Designed role-based functionality where professors can create, manage, and publish quiz modules.
- Implemented a modern dashboard to track student performance, quiz attempts, and daily activity metrics.
- Ensured smooth navigation and user-friendly interfaces for both students and faculty.

Technologies: HTML, CSS, JavaScript, PHP

Tools: XAMPP, VS Code, GitHub

### (III) Emergency Ambulance Service Portal (Group Project) | May 2025

- Developing a real-time emergency ambulance booking platform to assist users during critical situations.
- Implemented location tracking using Google Maps API to fetch the user's current location and track the booked ambulance.
- Designed a hospital selection module allowing users to choose preferred hospitals during ambulance booking.
- Integrated a hospital portal enabling hospitals to update bed availability in real time, prioritizing registered hospitals.
- Added emergency guidance features to help users take immediate first-response actions and contact doctors.
- Collaborated in a team environment following structured development workflows.

Technologies: JavaScript, Node.js, React

Tools: VS Code, GitHub, Figma, Google Maps API

## SKILLS

Skills: HTML, CSS, JavaScript, SQL

Frameworks & Tools: React, Git, GitHub, VS Code, Postman

Databases: MySQL, Oracle SQL Developer

Data Exposure: API data handling, basic dashboards, structured data interpretation

Professional: Analytical thinking, problem-solving, communication, time management

## Certifications

---

- **HTML5 & CSS3 Training** – Institute-led program
- **Foundations of User Experience (UX) Design** – Google (Coursera)
- **MS Office Basics** – College-certified training
- **Simulation involving sustainability consulting for Tata Consultancy Services** - Forage

## Hobbies

---

Listening to music for focus | Playing/Watching football | Exploring new places
