PROFILE SUMMARY

Aspiring MCA graduate with a strong technical foundation in software development, SDLC, DBMS, SQL/PL-SQL, and software testing. Hands-on experience with Java, Python, JavaScript, React, and database technologies through academic, professional, and project-based work. Familiar with developing web applications, analyzing requirements, troubleshooting issues, performing functional and UAT testing, and maintaining process and technical documentation. Detail-oriented and analytical, with the ability to work effectively across development, testing, data, and cross-functional teams.

EDUCATION

- Master of Computer Application | Techno College Hooghly | Hooghly, WB | CGPA : 7.44 (2025–2027)
- Bachelor of Computer Application | Techno India (Hooghly Campus) | Hooghly, WB | CGPA: 8.09 (2022–2025)
- ISC (Higher Secondary) | Meghmala Roy Education Centre | Kolkata, WB | 72.4% (2020–2022)
- ICSE (Secondary) | National Gems Higher Secondary School | Kolkata, WB | 75.57% (2010–2020)

SKILLS

Software & Testing Concepts: SDLC, OOPS, DBMS, Version Control, Manual Testing, Bug Reporting, Functional Testing, UAT

Tools & Platforms: Git, GitHub, VS Code, Postman, MS Excel, MS Office, Oracle VBCS

Technical Skills: HTML, CSS, JavaScript, SQL, Java

Professional: Analytical thinking, problem-solving, communication, time management

PROJECTS

(I) Online Quiz Website – QuizSphere | June 2024

- Built an online quiz management system enabling students to attempt quizzes mapped to their UG courses.
- Designed role-based access and functionality separating student and faculty (professor) permissions.
- Implemented a dashboard tracking student performance, quiz attempts, and daily activity logs — supporting monitoring and reporting needs.
- Ensured smooth navigation and a consistent, user-friendly interface across both user roles.

Technologies: HTML, CSS, JavaScript, PHP **Tools:** XAMPP, VS Code, GitHub

(II) Emergency Ambulance Service Portal (Group Project) | May 2025

- Developed front-end modules using React.js and JavaScript within a cross-functional team.
- Integrated Google Maps API for real-time location tracking and verification.
- Designed REST API communication between frontend and backend services, following documented interface specs.
- Collaborated using Git/GitHub version control workflows and Agile practices, including feature testing before release.

Technologies: JavaScript, Node.js, React **Tools:** VS Code, GitHub, Figma, Google Maps API

Certifications

- HTML5 & CSS3 Training – Institute-led program
- Foundations of User Experience (UX) Design – Google (Coursera)
- Simulation involving sustainability consulting for Tata Consultancy Services – [Forage](#)
- EY Technology Risk Virtual Job Simulation - [Forage](#)

Hobbies

Listening to music for focus | Playing/Watching football | Exploring new places
